Delta V6.0 - New Save Functions

In Delta V6.0, it is possible to save multiple data displayed in the **Data Slate** window to one file in the JDA format. It is also possible to save the processed 2D data altogether with high resolution 1D data to one file in the **2D Viewer** window.
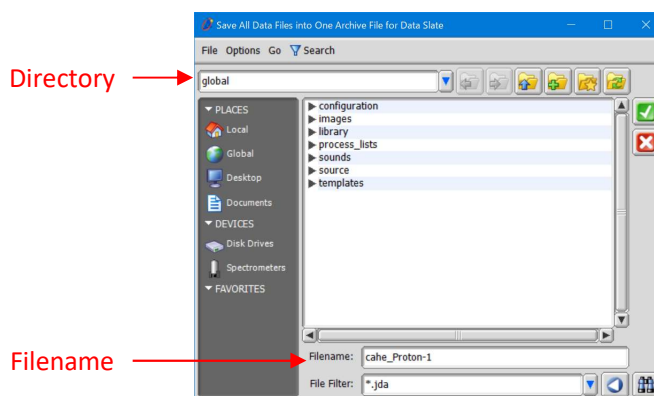

In the 1D Processor and Data Slate windows :

Click the **Save All Data** 🖫 button to save all data in the **1D processor** or **Data Slate** window to a single JDA file.

★ The FID data is kept under version number 1 and the FT-processed data is stored under version numbers 2, 3, and so on.

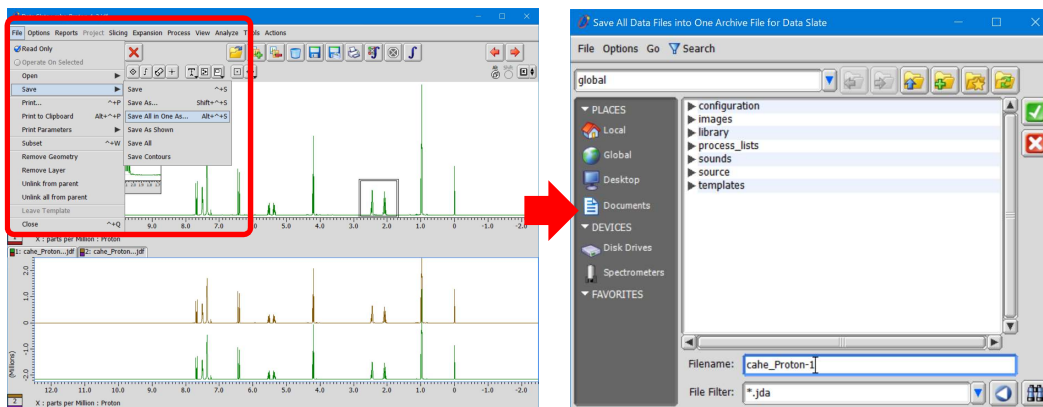

★ Click the **Save All Data** 🖫 button while holding the **Alt** key to select the directory and filename.

Delta Tips

● Select **File**－**Save**－**Save All in One As** in the menu bar.

This function is the same as holding the **Alt** key and clicking the **Save All Data** button.

In the 2D Viewer window :

Click the **Save All Data** button to save all data altogether to a single JDA file.

★ In the **2D Viewer** window, the **Save All Data** button has the same function as the **Save All Data** button in the **Data Slate** window. It is also possible to use the combination of **Alt** key and the **Save All Data** button or select **File**－**Save**－**Save All in One as** in the menu bar.
